20 GRIND SETTINGS

PROFESSIONAL GRINDING BURRS
DIAMETER (FLAT TYPE): 60 MM

GRINDING OF ALL COFFEE TYPES

ESPRESSO
VERY FINE, SIMILAR TO TABLE SALT OR POWDERED SUGAR. IT IS THE FINEST GRIND. ALMOST LIKE SAND.

0-4
(EXTRA FINE GRIND)

AEROPRESS
NOT AS FINE AS ESPRESSO BUT FINER THAN FILTER COFFEE. IMAGINE IT BEING SIMILAR TO TABLE SALT.

4-6
(MEDIUM FINE)

SIPHON COFFEE
COARSER THAN TABLE SALT, WITH LARGER AND MORE NOTICEABLE GRAINS.

8-10
(MEDIUM GRIND)

COLD BREW
AS FINE AS POWDERED SUGAR OR FLOUR. IT IS EXTREMELY FINE, ALMOST LIKE A POWDER.

15-19
(MEDIUM GRIND)

MOKA POT
A BIT COARSER THAN ESPRESSO BUT STILL FINE. IMAGINE IT AS SLIGHTLY COARSER THAN POWDERED SUGAR, YET STILL SOMEWHAT POWDERY.

4-6
(MEDIUM FINE)

FRENCH PRESS
COARSE, BUT NOT AS COARSE AS FOR A FRENCH PRESS OR COLD BREW. IT SHOULD RESEMBLE KOSHER SALT IN SIZE.

12-15
(MEDIUM GRIND)

FILTER COFFEE
VERY COARSE, LIKE SEA SALT OR EVEN SLIGHTLY LARGER. THIS ALLOWS FOR LONGER EXTRACTION WITHOUT OVER-EXTRACTION OR BITTERNESS.

12-15
(GROBES MAHL)

NITRO COFFEE
SIMILAR TO FILTER COFFEE, MEDIUM GRIND. SLIGHTLY FINER THAN FOR THE FRENCH PRESS.

19
(COARSE GRIND)

PERCOLATOR
FOR BEST RESULTS, USE A VERY COARSE GRIND AS IT IS BREWED OVER A LONG PERIOD OF TIME.

20
(VERY COARSE GRIND)
